

SOLUTION

SAP Security Maturity Assessment

Understand and enhance SAP security with analysis, benchmarking, and targeted recommendations based on your risk profile and business goals.

SAP runs the heart of your business, with up to 90% of your company's revenue flowing through it. Yet many organizations aren't confident their SAP security measures are keeping pace with business growth, changing needs, and emerging risks.

Our SAP Security Maturity Assessment helps you secure your most critical system with confidence, validating where you stand today and providing actionable recommendations to protect your enterprise and drive performance.

Why choose Turnkey?

- **Unbiased assessment backed by 20+ years of SAP security expertise** — objective recommendations with no transformation agenda to sell.
- **End-to-end evaluation across your entire SAP security landscape** — technical, organizational, and architectural.
- **Actionable, business-aligned guidance** — a roadmap of what to do and when, based on your strategic objectives, regulatory requirements, industry, and size.

Benefits

Security validation

Validate your security posture against your risk profile and industry peers.

Greater visibility

Understand gaps, risks, and opportunities and how to address them.

Clear priorities

Know what initiatives to tackle first based on impact, effort, and available resources.

Strategic alignment

Ensure security supports strategic goals and regulatory requirements.

How it works

Timeline: 1 month

We assess:

- **Technical landscape** and controls across 4 domains:
 - Roles and authorizations
 - GRC
 - Threats & vulnerabilities
 - SAP architecture security
- **Organizational capability** and security culture
- **Business process** and priorities

You receive:

- Overall maturity rating
- Maturity diagram visualizing current vs. target maturity
- Diagnostic findings citing gaps and areas for improvement
- Roadmap of recommendations prioritized by potential impact
- Tooling suggestions to help reach targeted maturity

Trusted by enterprise clients including Ball, GSK, and BP.
